**Methodology**

**EPIC • MRA** analyzed 627 mail-out surveys that were returned to the City of Auburn Hills. Surveys were designed, written and administered by the City of Auburn Hills in partnership with AARP. Surveys were mailed and distributed to residents age 50 and over. The 627 surveys returned were data entered by **EPIC • MRA**, analyzed, with the findings included in the following report.

Generally, in interpreting survey results, all surveys are subject to error; that is, the results of the survey may differ from that which would have been obtained if the entire population was interviewed. The size of the sampling error depends on the total number of respondents that are asked a specific question. The table on the next page represents the estimated sampling error for different percentage distributions of responses based on sample size. The 627 surveys returned yields a sampling error rate of ±3.9% with a confidence level of 95 percent.

For example, 50 percent of all 627 respondents said they were satisfied with the well-maintained streets and roads in Auburn Hills (Question #09J). As indicated in the chart below, this percentage would have a sampling error of plus or minus 3.9 percent. That means with repeated sampling, it is very likely (95 out of every 100 times), that the percentage for the entire population offering this response would fall between 46.1 percent and 53.9 percent, hence 50 percent ±3.9 percent.
EPIC • MRA  SAMPLING ERROR BY PERCENTAGE (AT 95 IN 100 CONFIDENCE LEVEL)

EXECUTIVE SUMMARY

The City of Auburn Hills/AARP resident survey focused heavily on the juxtaposition of importance-versus-satisfaction for a myriad of amenities and features available in the community. The areas of inquiry are grouped broadly under the headings of “Community Features” (with subheadings of “Housing”, “Outdoor spaces and buildings”, “Transportation and roads”), “Health Services” (with a subheading of “Community health services”), “Social Activities, Volunteering, and Education Opportunities” (with subheadings of “Social activities and inclusion” and “Volunteering and civic engagement”), “Job Opportunities” (with a subheading of “Employment”), and “Community Information” (with a subheading of “Communication and information”). In addition, the topics of “Community Streets and Transportation”, “Internet and Media Usage” and issues going to respondents’ residency were explored, as well as important demographic inquiries.

The analysis of importance-versus-satisfaction is, perhaps, of the most interest. The ratings given for Total Importance (that is; the sum of the percentage of respondents offering a “Very Important” AND “Somewhat Important” response) often far outweighs the ratings given for Total Satisfaction (that is; the sum of the percentage of respondents offering a “Very Satisfied” AND “Somewhat Satisfied” response).

One instance that clearly exemplifies the disparity between the importance-versus-satisfaction ratings can be found under the section titled “Community Features”. In this example, under the subheading of “Housing”, a question was asked of respondents about the importance of affordable home repair contractors. Ninety-three percent of respondents offered a response of ‘Important’ (82% “Very Important”, 11% “Somewhat Important”), but when later asked about their ‘Satisfaction’ with the availability of affordable home repair contractors in Auburn Hills, only forty-three percent of respondents offered a response of ‘Satisfied’ (21% “Very Satisfied”, 22% “Somewhat Satisfied”).

At first blush, such a disparity between the high level of Importance placed on an item and the relatively low level of Satisfaction with experiencing it might suggest a high level of Dissatisfaction with that specific subject under consideration. It is cautioned, however, that the reader should first consider the Neutral ratings given by the respondents before drawing any strong inferences between disparities discovered in the ‘importance-versus-satisfaction’ ratings. Using the same example of affordable home repair contractors, when asked about how Important it was they be available, only seven percent of respondents offered a Neutral rating, but when later asked about their Satisfaction with the availability of affordable home repair contractors in Auburn Hills, a majority (51%) of respondents offered a Neutral response. Inasmuch as there was no option to be “Undecided” on any given question throughout the entire survey, it is reasonable to conclude that in many cases, a response of Neutral may only mean the respondent has no basis upon which to form an opinion and is, for all intents and purposes, be tantamount to an Undecided response.
Taken as a whole, it is worth noting that, for nearly all of the 70-plus individual items examined in the combined ‘importance-versus-satisfaction’ batteries of questions, respondents overwhelmingly offered responses of high levels of Importance. For those described under the “Community Features” and “Health Services” headings tend to rank in the mid-eighty to low-ninety percentage ratings of Total Importance; with the majority of the Total Importance for each coming from respondents that offered a rating of “Very Important”. Topics examined under the “Social Activities, Volunteering, and Education Opportunities” heading tend to rank in the high-sixty to mid-eighty percentage ratings of Total Importance; with the majority of the Total Importance for each once again coming from respondents that offered a rating of “Very Important”. Topics examined under the “Job Opportunities” heading tend to rank in the high-seventy to mid-eighty percentage ratings of Total Importance; with the majority of the Total Importance for each once again coming from respondents that offered a rating of “Very Important”. Topics examined under the “Community Information” heading ranked, almost exclusively, an eighty percentage rating of Total Importance; with the majority of the Total Importance for each once again coming from respondents that offered a rating of “Very Important” - the one noted difference coming from the question that asked about the importance of information being made available in a number of different languages, for which respondents offered a response of fifty-four percent Total Important (28% “Very Important”).

A similar section-by-section analysis of Total Satisfaction for each item, however, would ultimately prove meaningless, given the frequently very high percentages of Neutral responses.
KEY FINDINGS

Residency in Auburn Hills

- In next 10 years, 15% of respondents said they were likely to move to a different home in Auburn Hills, with 27% saying that they are likely to move to a different home outside of Auburn Hills.

- 66% majority rated Auburn Hills as an “excellent” (25%) or “very good” (41%) place to live as they age.

- 49% plurality said it was only “somewhat important” (30%), “not too important” (15%), or “not important at all (4%), to remain in Auburn Hills as they age, while 47% said it is “extremely important” (17%) or “very important”(30%) to remain in Auburn Hills.

- 73% said it is “extremely important” (40%)/“very important” (33%) to remain in their home as they age.

Housing Features

- The top four housing features community members said were important were: “well-maintained homes and properties” (93% important); “home repair contractors who are affordable” (93%); “home repair contractors who do quality work” (92%); and “home repair contractors who are trustworthy” (91%).

- Community satisfaction with housing features was highest (66% satisfied), with “well-maintained homes and properties.” A distant second was “home repair contractors who do quality work” (46% satisfied); tied with “affordable home prices for residents of varying income levels” (46%); closely followed by “a variety of home contractors to choose from” (44%); “trustworthy home repair contractors” (44%); and “affordable home repair contractors” (43%).

Community Features

- The top six most important features of outdoor spaces and buildings included: “well-lighted streets” (95% important); “well maintained public buildings” (95%); “streets that are safe for pedestrians and bicyclists” (94%); “handicap accessible public buildings” (92%); “accessible, clean public restrooms” (91%); and “well-maintained public parks” (91%).
• Top areas of satisfaction with outdoor spaces and buildings were: “public buildings that are well-maintained/clean” (82% satisfied); “well-maintained public parks” (82%); “public parks that are close by” (79%); and “well-lighted streets” (73%).

• The most important features of the transportation and roads system included: “well-maintained streets and roads” (98% important); “easy to read traffic signs” (95%); “appropriate speed limits for safety” (93%); and “easily accessible public parking (lots, spaces, areas)” (92%).

• Areas of satisfaction with transportation and roads that were the highest were: “easy to read traffic signs” (71% satisfied); “appropriate speed limits for safety” (66%); “easily accessible public parking (lots, spaces, areas)” (63%); and “multi-use trails for biking, running walking” (60%).

Health Services
• Areas considered most important among community health services were: “well maintained hospitals and health care facilities” (92% important); “local hospital or clinic answering services that are easy to understand and helpful” (91%); “respectful and helpful hospital and clinic staff” (89%); “conveniently located emergency care centers” (89%); and “easily accessible health and social services” (88%).

• Top areas of satisfaction with community health services were: “well-maintained hospitals and health care facilities” (63% satisfied); “conveniently located emergency care centers” (63%); “easily accessible health and social services” (59%); “respectful and helpful hospital and clinic staff” (56%); and “fitness activities for people age 50 and over” (55%).

Social Activities, Volunteering & Education Opportunities
• Areas of social activities and inclusion considered most important were: “activities that are affordable to all residents” (86% important); “activities that offer senior discounts” (85%); “activities for people age 50 and over” (83%); “continuing education classes like computer, cooking, or art” (80%); and “activities that are open to all ages” (79%).

• Areas of social activities and inclusion that earned the highest satisfaction ratings were: “conveniently located venues for entertainment” (65% satisfied); “activities for people age 50 and over” (64%); “activities that are open to all ages” (61%); and “widely publicized reliable information about activities” (58%).
• Of the four volunteering and civic engagement areas mentioned, the two considered most important were: “organizations that recognize and value their volunteers” (79% important), and “opportunities for people age 50 and older to participate in decision making bodies such as community councils or committees” (78%).

• The two volunteering and civic engagement activities that earned the highest satisfaction ratings included: “a range of volunteer activities to choose from” (45% satisfied); and “organizations that recognize and value their volunteers” (42%).

Job Opportunities

• Of the five employment features mentioned, the three considered most important were: “policies against age discrimination” (85% important); “workplaces that are adapted to meet the needs of disabled people” (82%), and “a range of flexible job opportunities for people age 50 and over” (82%).

• The employment features rated the highest in satisfaction, albeit by low percentages, included: “policies against age discrimination” (32% satisfied), and “a range of flexible job opportunities for people age 50 and over” (32%).

Community Information

• Communication and information features considered most important of five that were listed included: “printed information that has large lettering and is clearly displayed” (82% important); “free access to computers and the Internet in public places such as the library, community centers or government buildings” (81%); and “automated phone information that is clear and easy to understand” (81%).

• Communication and information features that scores highest in satisfaction were: “free access to computers and the Internet in public places such as the library, community centers or government buildings” (56% satisfied); “access to public/civic affairs information in one central location” (54%); and “printed information that has large lettering and is clearly displayed” (47%).
Community Streets & Transportation

- An overwhelming 93% majority of respondents said they drive themselves to get around Auburn Hills, with 37% saying they walk, 33% getting a ride with family or friends, and 17% saying that ride a bike.

- Most respondents are getting around, with a narrow 51% majority saying that in the last month they got out to go shopping, visit the doctor, run errands or visit friends and family every day, and another 36% saying they got out several times a week.

- Only 3% said they always or frequently miss activities because they do not have transportation, with another 6% saying they sometimes miss activities.

- Only 5% said they have used public transportation in the past six months.

- More than a third, 36%, said that if public transportation service were affordable and easily accessible in Auburn Hills, that they would be “very likely” (13%) or “somewhat likely” (23%) to use it.

- When respondents were asked if they or their spouse or partner have a medical condition that makes it difficult, 16% said they, their spouse or partner or both, have a medical condition.

- A 64% majority said they are satisfied with the streets in their community in terms of their safety for pedestrians and bicyclists.

- A 57% majority said that if the streets in their neighborhood were safe for pedestrians and bicyclists, well lit, had good traffic signals and good crosswalks, they would be likely to walk or ride a bike instead of driving a car.

- A 64% majority said they are likely to support a policy in Auburn Hills, like policies in many cities and states across the country, to design roads for all users, not only drivers, but pedestrians, bicycle riders and those using public transportation.

- If respondents could safely walk from their home, the top places they said they are most likely walk to is a “park or recreation area” (45% likely); “a pharmacy” (33% likely); “a grocery store” (29% likely); and a “doctor’s office” (24% likely).
Internet & Media Usage

- An 82% majority said in the past 12 months they accessed the Internet or sent or received e-mail.

- Of the 82% who accessed the Internet, the top uses of the Internet was to “send and receive e-mail” (92%); “seek information on community events, news or schedules” (74%); and “buy a product online, such as books, music, toys, clothing” (72%).

- The most helpful sources of news and information about Auburn Hills was: the “City Newsletter” (77%); the “newspaper” (50%); “City website” (41%); and “local network TV affiliates” (33%).

Your Residence

- 84% owns their home; 14% are renters.

- The top type of homes that are primary residences were: “single family home” (57%); “a condominium or cooperative” (24%); “apartment” or “mobile home” (8% each).

- 82% said it was important to stay in their current residence for as long as possible.

- 23% said their current residence needed major repairs, modifications or improvements to their residence to enable them to stay there as long as they can:
  - The top improvement, cited by 23%, was “bathroom modifications such as grab bars, handrails, high toilet or non-slip tile.”
  - Next highest at 19%, was “structural changes or major repairs such as a new roof or new plumbing.”
  - Third highest, at 13 percent, was “better lighting.”
SURVEY FINDINGS
RESIDENCY CHARACTERISTICS

Most residents age 50 and over have lived in Auburn Hills an average of 22 years
One in four respondents (26%) has lived in Auburn Hills less than 10 years, one in five (20%) lived in the community for 10 to 14 years, and a 55% majority lived in the area for 15 years or more, including 20% for 40 years or more. The average number of years that residents over age 50 have lived in Auburn Hills is 22 years.

More than 9 in 10 reside in Auburn Hills Year Round
A 93% majority said they live in Auburn Hills year round, 7% said they live in the area seasonally, with 1% unsure.

In the next 10 years, most residents are not likely to move to another home in Auburn Hills

Almost all Auburn Hills residents age 50 and over live there year round

Extremely Likely 4%
Very Likely 4%
Somewhat Likely 7%
Not too likely 26%
Not likely at all 47%
Unsure 12%

Only 15% likely to move to another home in Auburn Hills
Only 15% of residents said they are extremely likely (4%), very likely (4%) or somewhat likely (7%) to move to a different home in Auburn Hills, with 26% not likely to move and 47% not at all likely.

In the next 10 years, just over 1-in-4 are likely to move to a different home outside of Auburn Hills.
Just over 1-in-4 (27%) said they are extremely likely (6%), very likely (5%) or somewhat likely (16%) to move to a different home outside of Auburn Hills, with 23% not likely to move and 37% not at all likely.
RESIDENTS’ OPINIONS on RESIDENCY IN AUBURN HILLS

Nearly two-thirds of respondents offer positive rating for Auburn Hills as a place to live as they age. 1-in-4 (25%) offered an “excellent” rating for Auburn Hills as a place for people to live as they age, 41% offered a “very good” rating, 26% offered a “good” rating, with 5% “fair” and 0% “poor.”

![Bar chart showing nearly two-thirds gave positive "Excellent"/"Very good" rating for Auburn Hills as place to live](chart)

Views are mixed on how important it is to remain in Auburn Hills as they age.
While 47% said that remaining in Auburn Hills was “extremely important” (17%) or “very important” (30%), 49% said it was only “somewhat important” (30%), “not too important” (15%), or “not at all important” (4%).
If you include those respondents who offered a lukewarm response of “somewhat important,” the total important percentage would increase to 77%, but that would include a view that would not be strong about remaining in Auburn Hills.

![Bar chart showing views are split on importance of remaining in Auburn Hills as they age](chart)
Solid majority said it is important to remain in their own home as they age

While opinion was more mixed about remaining in Auburn Hills, a 73% solid majority said it was “extremely important” (40%) or “very important” (33%) to remain in their own home, 23% said it was “somewhat important” (16%), “not too important” (5%) or “not at all important” (2%).
COMMUNITY FEATURES – IMPORTANCE OF; SATISFACTIONS WITH:

Housing

Most community housing features considered important
Nine community housing features were presented to respondents and they were asked if each feature was very important, somewhat important, if they had a neutral view, if it was not very important or not at all important. “Well maintained homes and properties” and “home repair contractors who are affordable” were the features that were each considered important by the highest total percentage (93% total important/82% “very important”), with others following as shown below:

<table>
