

SUPPRESSION SYSTEM FEES AND PROCEDURES

GENERAL

1. Four sets of complete drawings and calculations must be submitted. The suppression system contractor should allow a minimum of four (4) weeks for review of drawings.
Do not include any form of payment with the initial submission of drawings.
2. The Auburn Hills Fire Department will continue to witness all hydrostatic tests. The contractor must contact the Fire Prevention Bureau at least 48 hours prior to the test, for the purpose of scheduling. Contractor's material and test certificates must be provided to this department's representative at the time of the test.
3. The Auburn Hills Fire Department will no longer inspect sprinkler piping above finished ceilings or other concealed spaces. The contractor must schedule a piping inspection prior to installation of ceilings, or the enclosure of concealed spaces. Should this department encounter enclosed piping that has not been inspected, we will order the ceiling removed or concealed space opened. Again, 48 hours notice will be required to reschedule the inspection.
4. Absolutely no on-site work will be allowed without first obtaining a permit from this department. Permits will not be issued without approved drawings. Only blue line drawings will be accepted by this department for review. Installation of the system without first obtaining approval of construction drawings and installation permits will result in the plan review and permit fees being increased by 100%.
5. All items on the Auburn Hills Fire Department plan review letters must be incorporated on revised drawings. Letters addressing items will no longer be accepted. This procedure should eliminate later confusion.
Four sets of complete revised drawings and calculations must be submitted.
6. Systems must be designed utilizing a minimum 10 pounds pressure below the available supply to allow for variation in the municipal water supply system which can not be controlled.
7. A separate plan review and permit may be required for systems requiring detection and notification devices.

REVIEW FEES

1. Automatic Sprinkler Systems

Number of Sprinklers	Hydraulically Calculated Systems	
1 to 20	\$230.00	
21 to 100	\$485.00	
101 to 200	\$645.00	
201 to 300	\$740.00	
301 to 500	\$1085.00	
Over 500	\$1085.00	plus \$1.20 each sprinkler over 500

2. Gas Suppression or Dry Chemical Systems

Cubic Footage of Protected Area	Fee
0 to 5,000	\$520.00
5,001 to 10,000	\$645.00
